SCALER

Role: SDE Intern

Location: Remote (Bangalore)

Reporting to: AVP Engineering - Technology

About Scaler

Launched in 2019, Scaler is India's leading tech education company that upskills working professionals and educates aspiring engineering students. Scaler's industry-vetted curriculum provides solutions to real-world challenges addressing the changing dynamics of the technology industry through two flagship programs: Scaler Academy and Scaler DSML. Scaler believes in creating real-life impact by focusing on 'impact-driven' tech talent. Enrolled learners are mentored and taught by leaders and subject-matter experts working with leading organizations, including MAANG companies. Scaler has generated enviable career outcomes in a short period, and on average, its learners see a 4.5x RoI (return on investment) and salary hike of approximately 126%. To further redefine tech education, Scaler has launched Scaler Neovarsity - an online university that offers an outcome-focused Master's Programme accredited with ECTS and Scaler School of Technology - a 4-year residential UG program in Computer Science. Scaler Enterprise is its B2B arm that focuses on building relationships with domestic and global organizations to provide them with industry-ready talent. Over 900 companies have worked with Scaler for their tech recruitment needs. The startup's parent firm, InterviewBit, is featured on the Financial Times's Asia Pacific High Growth Companies 2021, 2022 and 2023 ranking. Valued at $710 million, Scaler is backed by marquee global investors like Peak XV Partners (formerly Sequoia Capital India), Tiger Global, and Lightrock India. It has expanded its footprints across India and the US.

Key responsibilities would involve

- Should be capable enough to build any complex web application using vanilla javascript.
- Experience in at least one modern frontend framework React(Preferred), Vue, Angular, etc.
- Knowledge of at least one relational database.
- Good understanding of both high-level and low-level architecture of systems.
- Should care deeply about writing clean, maintainable code even while solving hard technical problems.
- Able to work in cross-functional teams.

Good to have

- Hands-on experience with Ruby on Rails.
- Hands-on experience with AWS and infrastructure ownership.
- Product building experience.
- Experience in building frontend build systems using Gulp, Webpack, Babel, etc.

SCALER

Tech Stack

Ruby on Rails, React JS, Mysql, DynamoDB, AWS ECS, Redshift, Redis

Why Scaler

- Empowering role: You get a front-row seat to a high-growth, fast-paced B2C+B2B business in a role that expects you to learn and contribute specifically to high-impact initiatives critical to our trajectory
- Distinctive team: Our team is an inspiration powerhouse built with the best of Facebook, Google, Twitter, McKinsey, BCG, Sequoia Capital, Bain Capital, and Hotstar to name a few
- Unicorn trajectory: Unlike 99% of startups, we believe in sustainable growth. No wonder, we are profitable and on course to be a unicorn in the next 24-36 months.
- Marquee investors: Our investors are marquee firms such as Sequoia Capital (Investors in Google, Apple, and Cisco) and Tiger Global (a major investor in Flipkart). We are also backed by the Singapore govt along with other strategic angel investors.
- Culture of a caring meritocracy with great perks: A caring meritocracy built by inspirational leaders; free food, health insurance, and an ultra-chic office space
- Market-leading compensation: If we like you, we will make sure you like our offer :)
